

ABSTRACT

Each (1) of sandals, comprising an outer frame (9) forming the outline of a sole (3) and an inside member (15) formed of bar-like or plate-like crosspiece elements (13) installed in the outer frame (9) at specified intervals (11). Also each (21) of sandals (21) comprises a plurality of tilted hole parts (27) in a sole (3) so that bottom openings (23) are horizontally displaced from top openings (25). In each (31) of sandals, opening parts (33) partitioned by an outer frame (9) and an inside member (15) are formed aslant so that bottom openings (23) are horizontally displaced from top openings (25).
